

Chautauqua

The concluding day of chauntauqua here was wound up by the presentation of "Peg O' My Heart" by the Martin Erwin Players. A large audience was present, and all were excellently entertained by the able characterizations which featured this presentation. A dance followed the play. A sufficient number of guarantors were obtained and Chauntauqua entertainments will be held here next fall.

The Progress of Canada

Canada is forging steadily, even rapidly, to the front among the nations of the world. In all things material it is making great growth. Its trade, both domestic and foreign, is expanding as never before, and as a result every branch of industry is active. The country has just harvested one of the largest crops in its history, mining discoveries and operations are proceeding on an unprecedented scale, factories are working overtime, building operations in all provinces are reaching totals hitherto unrecorded, with the result that employment is general, wages good, and population increasing.

Important and gratifying as this material growth and prevailing prosperity is to our people, a much more vital matter to Canada is whether the Dominion is likewise making progress in those other directions which are essential to the upbuilding of a nation in the truest sense. Are the Canadian people becoming merely a nation of money-seekers, measuring their success in terms of dollars and statistics recording economic development and growth, or are they utilizing the larger advantages and increased power which material progress affords in conferring upon them to encourage and develop those arts and characteristics which stamp a people as truly advancing to greatness?

We believe signs generally point to the fact that the people of Canada are, taken as a whole, more intensely interested today in the spiritual, intellectual, moral growth of their country than at any previous period; that, in fact, they are deeply concerned, and very determined that the national ideals and character shall be maintained at a high level.

The widespread interest in and discussion of the subject of immigration is but one manifestation of this spirit. Considered solely from a material standpoint it would probably pay Canada to enormously increase its population just as rapidly as possible. Economically Canada would profit greatly by absorption by the United States. But Canadians are instinctively that quality rather than quantity shall be the governing factor in our immigration policy, and it would be hard to muster a corporate regard for out-standing men who favor the policy of immigration.

Throughout Canada increasingly sympathetic attention is being given to the assimilation of the non-British people within our borders into the Canadian family. Here and there people may adopt an unfriendly and unfair attitude towards these people, but to that extent regard the good work, but they are exceptions to the generality of Canadians. More and more it is being realized that these people are making a real contribution to the national life of Canada, bringing to us music, poetry, traditions and handicrafts which are enriching this Dominion.

The increased attention being given to musical performance and symphony orchestras, to the establishment of art galleries and museums, to scientific research, to literature and the rapidly increasing number of libraries, and to the steady improvement in Canadian magazines and publications of a better class, all go to prove that the people of Canada are not wholly materially minded.

The wonderful success which has attended the application of co-operative principles in the solution of production and marketing problems, and in the provision of public services for the use of all the people, is having its inevitable effect upon the minds of all people. To an ever increasing extent they are beginning to realize that if through loyal co-operation they can remedy material evils and advance their individual and corporate welfare, through the acceptance of the same principles and their application to all phases of community, provincial and national life they can greatly advance the welfare of the country as a whole.

Co-operation is better than competition or antagonism. Sympathetic consideration and helpful co-operation is better than hatred and the maintenance of bitter animosities. In the practical work of co-operation the Canadian people are learning that there are two sides to almost every question, that people who are different are not necessarily enemies, and that the road to ultimate success and the greatest good to the greatest number lies along the path of friendly compromise rather than in continual enmity and warfare.

Canada's progress is, therefore, a well balanced progress, and because of this gratifying fact the people of the Dominion may look to the future with unbounded confidence to the future of their great country.

A Railway Revolution

Train in England Electrifies Line as it Travels

A train which has puzzled many people has been running over a portion of the L.M.S. railway in England, says an article in "Amateur Engineer."

It looks like an electric train, and

the track over which it has made its journey is not electrified. Really, it is an "ole-electric" train, which electrifies the line as it goes along. Its engine-car contains a Diesel engine, which drives generators to supply electric current to the motors. The whole equipment works so simply that there is a saving in labor costs, while the fuel used weighs only an eighth of that required for a steam locomotive.

Here is a real railway revolution. Already exhaustive tests have been made. In Canada, for instance, a Diesel electric train covered the distance between Montreal and Vancouver, 2,837 miles—in 67 hours, beating a steam train by 38 hours. Another 334 miles run was accomplished at a speed, on the average, of over 60 miles an hour.

Engineering Fact a Success

An engineering project, unique in Canadian industry, was declared a success at Port Arthur, Ont., when tests were made of a pipeline by which ground pulp in fluid form is carried from a grinding mill of the Thunder Bay Paper company, at Current River, to the paper mill two miles north. The tests were highly satisfactory, states the Thunder Bay newspaper. The pipe is of cast iron, ten inches in diameter, and two miles long.

Wife (reading the paper): "It says here that a London man boasts he has had an umbrella for 20 years." Her Husband: "That's long enough. He ought to retire it."

Headache? Relieve with Minard's Liniment.

To Aid Farm Workers

Clearing House to Furnish Winter Farm Employment May be Established

While no definite decision has been reached yet, a central clearing house, from which British miner-harvesters will be furnished winter employment may be located in Regina. The establishment of such a bureau, though not necessarily in this city, is expected to be the outcome of a conference held at the Parliament Buildings, Regina, on September 12, attended by representatives of the Federal and Provincial Departments of Colonization, those of the two great railways, the Government Labor Service and the United Farmers of Canada, Saskatchewan section.

RHEUMATIC MISERY

Relief Can Only Come Through Better Blood—Liments of No Use.

In no other disease does the blood come so rapidly as in rheumatism. Not only does it become thick but it is loaded with impurities—rheumatic poisons. Without the proper treatment these poisons increase, the joints are inflamed and the patient becomes a cripple. Most treatments are aimed at the joints and the patient suffers with very unfavorable condition a renewed attack follows.

To cast out rheumatism the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can be accomplished by a course of Dr. Williams' Pink Pills, which have a specific action on the blood, giving it new richness and redness. Thousands have tried this treatment with beneficial results. That even old-fashioned rheumatism who does not try Dr. Williams' Pink Pills is neglecting the most hopeful means of recovery is shown by the statement of Mr. David Carroll, Detroit, N. S., who says: "For years I was troubled with rheumatism. The pains were not only excruciating, but they always returned, and kept getting worse. I tried so-called electric belts and liniments, but did not get more than temporary relief. Then I had a friend who suffered from this trouble who realized what I needed and he gave me a box of Dr. Williams' Pink Pills. As soon as I took the first medicine helping me so I gladly continued the course. In a few days I found that every trace of the trouble had disappeared and there was a great improvement in my general health. It is now two years since I took Dr. Williams' Pink Pills and I have not had the least twinge of the trouble since that time. That is why I confidently recommend the pills to other sufferers."

You can get these Pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Company, Brockville, Ont.

Kritik—Do you think you've improved "Richard III." much by rewriting it?

Claymouth—Sure. It was way out of date. For instance, where Richard holds a "A horse! A horse! My kingdom for a horse!" I had the poet say, "A plane! A plane! My dictatorship for a plane!"

The Poor Man's Friend—Put up in small bottles that are easily portable for every emergency, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Twenty years ago half of the population of 200,000,000 women and girls in China had crimped feet, but today almost every village has a woman's shoe store which displays an attractive array of footwear.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

If a huge clatter, large enough to cover Trafalgar Square and as high as the clouds were built up in water-tank, London would empty it twice daily.

BEAUDRY LEMAN, General Manager
Banque Canadienne Nationale

Director, Shawinigan Water and Power company; Montreal Tramways company, and Asbestos corporation. Born, Montreal, 2-1-1878, son of Dr. Joseph Beaudry Leman. Educated Mount St. Louis College, private tutor, University of Lile, France, McGill University. Mayor of Shawinigan Falls, Que. from 1901 to 1907; member of the House of Commons, Montreal, March to Caroline Beique, daughter of Hon. F. L. Beique, May 12, 1908. Has three sons and two daughters. Address 507 St. Catherine Road, Outremont, Quebec.

Junior League of British Nations

Proposal to Form Branch of British Empire Junior League

"To the British Empire, at least, it would be a real junior league of British nations," stated M. A. MacPherson, M.L.A. for the Regina constituency, when speaking of the proposal of the British Empire Junior League to form a branch of the British Empire Junior League.

The Regina member further expressed his opinion that such an organization, having as it does, the aim of trying to bring the different nations and colonies of the British Empire into closer understanding and contact with each other, would most certainly be a splendid one for the province to adopt.

It is proposed that at the next meeting of the Junior League of the provinces of Ontario, Saskatchewan, Alberta and Manitoba, this scheme be presented to the members of the respective assemblies and with their approval, the work of organizing such an association be definitely undertaken.

The Old for the Farmer—A bottle of "Old" for the farmer is a bottle of "Old" for the farmer. A bottle of "Old" for the farmer is a bottle of "Old" for the farmer. A bottle of "Old" for the farmer is a bottle of "Old" for the farmer.

Canadian Amateur Golf Championship

Will Be Held at Jasper Park Lodge Next Year From August 10 to 24

Authentic information was received at Jasper National Park by the visiting British Golfers from Great Britain that the United States National Amateur golf tournament will be held next year over Pebbles Beach, Calif. from September 2 to 7. With these dates now definitely assured it is also possible to state positively that the Canadian Amateur championships will be held over the Jasper Park Lodge golf course next year from August 19 to 24. The deferring of these two important dates in the golfing program for 1929 leaves an interval of a full week between the Canadian and U. S. Amateur events and it is more than likely, therefore, that the Canadian championships will attract a larger number from the gallery of stars in the United States and other countries who will be westward bound for the U. S. event. Should these hopes be fulfilled and such effort is to be made by the Royal Canadian Golf Association and the Canadian National Golfers to bring them to fruition, the 1929 Canadian Amateur championship will be the greatest event in the history of golf in Canada.

Tombs Dealer (after several false suggestions): How would just a simple "Coke Home" do for an inscription?

The Widow: I guess that will be all right. It was about the last place he ever thought of going.

Speaking of serious reading, how is this from the bank, "Your account is overdrawn."

How French Police Work

Use Soundless Whistles to Tourist Trade Is Not Far Behind Alarm to Headquarters

Policemen in most of the large French towns can summon help without being heard. They are supplied with whistles whose notes are far too high-pitched for the human ear to detect. These inaudible sound waves are picked up by microphones skilfully camouflaged throughout the city and an alarm is flashed to central police headquarters.

A policeman who sees a burglar at work can summon reinforcements without alarming the suspected. He can, too, direct the sending of aid in Morse code by using the soundless whistle.

Good-bye Ashland. Persons suffering from that extremely trying trouble known as asthma know that it is in long with it. They have to escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. C. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

What would really have settled the whole thing is for Mr. Kellogg to have written into his peace pact that no nation engaged in war could borrow money of the United States.

A torch has been devised that can cut steel in a sunken ship at any depth.

Demand

For Aspirin

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every label, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it isn't. Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart.

Aspirin is the name of the trademarked Bayer Aspirin. While it is well known that Aspirin means Bayer Aspirin, the name Bayer is on every label, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it isn't. Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin at any drugstore—with proven directions.

Becoming Great Industry

Tourist Trade Is Not Far Behind Wheat Exports

The Federal cabinet, Natural Resources, puts in a graphic way the importance of what it describes as "a new giant of Canadian business," being the second among five, the tourist trade. The industry valued last year at \$390,624,000, expenditure of tourists from abroad estimated, \$77,000,000; mineral production, \$244,520,000; pulp and paper mills, \$219,328,000, and building permits, \$154,613,000. A few more years and our tourist trade will be our greatest asset!

Mrs. Littlest—Tilly, you've left my lingerie scattered all around the room and I'm expecting company, my minnie.

Tilly, the Maid—That's all right, ma'am, I'll keep you on 'em and see they don't pinch nobody.

WHITE STAR LINE CANADIAN SERVICE

W. N. L. 1754

British Harvesters On Return To England Speak Well Of Canada

LONDON.—British harvesters who returned to Great Britain recently landing at Liverpool from the liner Andania, strikingly refuted complaints concerning conditions in Canada brought back by other harvesters. There were many harvesters from the Andania who had been quite successful in the Dominion.

The majority of the men returning recently said they had found steady employment in Canada at wages of from three to four dollars a day. Some of them were able to pay their passage home at the special rate of \$60.

One harvester from Wigan, after paying his passage home had \$65 in his possession. A striking example of the kindness shown many of the harvesters by Canadian farmers was given by a young Britishman named Hoare. Hoare said he was taken ill while working in the field and the farmer and his wife not only took care of him during his illness but paid him for three days at the rate of \$3 a day.

The harvesters who returned recently were very bitter over the action in Canada of which they termed the "Communist action." This section, they stated, wrecked the scheme as soon as the harvesters landed in Canada. Their influence had been so bad that in many instances Canadian farmers, before employing the harvesters, asked whether they were Communists.

Arrest Train Bandit

Robber Of Ontario Mail Car Offered No Resistance

Windsor.—Three hours after a mail car had been rifled of Canadian currency estimated at about \$40,000, John Gibbs, 20, said to be a resident of Los Angeles, Cal., was arrested by the local police on the Detroit River ferry and landed in the goal here. According to authorities here he had admitted his guilt. When taken into custody he was carrying two pistols but offered no resistance to the officers.

The robbery was a most daring one, the lone bandit holding the mail carrier helpless at the point of a revolver while he calmly looted the car.

First Freight Has

Reached Flin Flon

Five Tractors Have Been Delivered At Site

Flin Flon, Man.—Following the driving of the last spike on the Flin Flon Railway, freight has started to arrive by train and the first load, consisting of five tractors with fuel on attachments, delivered a mile S. There are now 15 tractors hauling freight in and out of the town. The arrival of a further shipment of tractors is expected in the near future and by freeze-up roads to Island Falls should be in shape to start the heavy traffic which will cross them during the coming winter.

Eliminate Level Crossings

Toronto.—With the object of eliminating every level crossing in Ontario the provincial department of highways is having an official report made on every point where railway lines cross one of its highways.

Hon. W. D. Euler Issues Denial of Charge Against His Department

Ottawa.—Hon. W. D. Euler, minister of national revenue, has issued a lengthy statement dealing in detail with a certain charge reported to have been made by H. H. Pooley, attorney-general of British Columbia, against the department which Mr. Euler administers.

Mr. Euler declares that his department is attempting in all sincerity to co-operate with the provinces in the enforcement of their liquor laws and that not in a single instance have licenses for breweries or distilleries been granted when they have been opposed. The minister denies specifically with the shipment of a carload of whisky from the distillery of Gooderham and Worts to which, ac-

Turned Adrift In Leaky Boat

Quebec Liquor Commission Inspector Threatened With Death By Captors

Montreal.—Joseph A. Patry, Quebec liquor commission inspector, was kidnapped by bootleggers at Riviere Du Loup. He managed to reach shore by paddling his craft with an old piece of wood.

Patry was instructed to probe suspected illegal transportation of liquor by boat to New Brunswick, and with two companions set out for a large gasoline yacht which was anchored a short distance from the Riviere Du Loup wharf. The inspector managed to scramble aboard, but before he could mount the boat, the yacht's engines were started and the yacht set out for the middle of the river. Patry, tried to draw his revolver, but his arms were seized from behind and he was warned if he raised an outcry he would be killed. He was then thrown overboard. Later on the officer was lowered into a leaky rowboat and left to his fate. The matter has been reported to the authorities.

Fire Takes Four Lives

When Farm House Near Brandon

Was Destroyed, Four Persons Were Burned to Death when the farm house of Alex Wilson, near Moore Park, Man., was destroyed by fire.

The dead: Mr. and Mrs. Alex Wilson, Mervin Wilson, their son, and Miss Sarah Wilson, their wife. The fire was discovered by J. M. Harrison, a neighbor, when he was awakened by the smell of smoke from the flames upon his windows. He put on his clothing and rushed out to discover that the Wilson house was on fire. The blaze was too far advanced at the time to permit rescue work.

W. E. Mann, general storekeeper at Moore Park, father of Mrs. Wilson, was also quickly on the scene, but the heat was so intense that he could not get near the building. All of the bodies were recovered. The cause of the fire is a mystery. The barn, garage and other buildings on the farm were unharmed.

Odd Accident To Airplane

Making Forced Landing Was Carried Out Over Lake

Ottawa.—An unusual forced landing at Black Lake, Que., in which the engine of a four passenger airplane, injured, has been reported to the air board by the Canadian Transcontinental Airways.

Engine trouble forced down a plane piloted by V. A. Chon. An effort was made to land on the ground but the engine carried the machine out on the water. A serious accident was only avoided because it was the lightest type it was stated. The left wings of the aircraft were slightly damaged.

Nurses For Labrador

Montreal.—Two nurses, Misses Canby and Cole, have left Quebec for Labrador, dispatched there by the Federal Minister of Health. They will act at outlying stations of Harrison and Mutton Bay.

General Allenby In New York

British Hero Honored By Official Salute Of 17 Guns

New York.—Field Marshal Sir Edmund H. H. Allenby, so-called last crusader, who conquered the Turks in Palestine and Egypt for the British, was welcomed on his arrival here for the American Legion Convention to be held soon in San Antonio.

Arriving on the liner Majestic with Lady Allenby, General Allenby received an official salute of 17 guns from the army reservation on Governor Island as the city's reception boat Macom carried him from the liner to the battery at the Southern tip of Manhattan Island.

The British hero spoke of the growing "tendency toward 'open diplomacy'" among nations but saw no sign for great disarmament at present. "I do not believe there is anyone in the world who does not want peace if they can get it," he said. "However, one has to be ready for war, as you do not keep burglars out by leaving the door unlocked."

Exhibit For Royal Winter Fair

Saskatchewan Will Send Fifty Of Its Best Horses

Regina.—Fifty horses, the pick of the Clydesdales, Percherons and Belgians in the province, will represent Saskatchewan at the Royal Fair, Toronto, in November. It was decided at a meeting of the livestock board held recently.

While many selections have yet to be made, both in horses and other classes, the board has definitely decided that the following will exhibit: Clydesdales:—The Experimental Farm at Indian Head, the University of Saskatchewan, John Falcum, Govan, and Mrs. W. H. Bryce, Donegal Lodge, Arcola.

Percherons:—C. M. Rear, Regina; Robert Weldon; George Dean, St. Joseph's, and Mrs. W. H. Bryce, Donegal Lodge, Arcola.

Belgians:—C. M. Rear, Regina; Robert Thomas, Grandora, Andrew Nolan, Rouleau.

In the horse exhibits from this province there will be 30 Clydesdales, 15 Belgians and 15 Percherons. Many exhibitors are yet to be named.

Will See Air Liner Arrive

Canadian Engineer Going To Lakehurst To Represent Dominion Air Board

Ottawa.—Wing Commander E. W. Steadman, chief Canadian aeronautical engineer, will view the arrival of the German air liner Graf Zeppelin at Lakehurst, N.J., as representative of the Dominion air board it is learned.

Mr. Steadman examined the big ship this summer when in Germany and discussed the flight with Commander Fokker and other officers who will be in charge of the aircraft. Special attention will be given to the methods used for mooring the immense craft at Lakehurst.

A mooring mast 200 feet in height is being constructed by the Canadian Government at the flying field at St. Hubert, Que., and some improvements may result from Mr. Steadman's observations.

Premier King Returning

Ottawa.—Premier Mackenzie King will sail for Canada on or about the 16th of this month, according to word received here. He will probably be accompanied on his return journey by Hon. C. A. Dunning, minister of railways, and Hon. R. Dandurand, government leader in the senate.

Finds Lost Scout

Windsor, Ont.—Col. Collins of South African descent to the Empire Parliamentary Association, discovered W. Muncey, missing Canadian scout of the Boer War, whom Collins has been seeking all over Canada, resides at 1234 25th Avenue, Vancouver.

POLICY IS CRITICIZED

Lord Cusden, whose foreign policy on behalf of Great Britain is denounced by David Lloyd George as "one of barely veiled subserviences to France."

Lord Cusden, whose foreign policy on behalf of Great Britain is denounced by David Lloyd George as "one of barely veiled subserviences to France."

Believes River Under Control Of Dominion

Hon. N. W. Rowell Says Federal Rights Not Limited To Tidal Waters

Ottawa.—The Dominion parliament has authority to declare the existence of a public right of navigation over any river navigable in fact. Before the Supreme Court of Canada, Hon. N. W. Rowell, K.C., counsel for the Dominion, made this further contention on the question of federal and provincial control respecting navigation and water ways.

"If a public right to navigation does not exist, as Ogilvie suggests, on the Great Lakes and the western portion of the St. Lawrence, Mr. Rowell proceeded, then under the British North America Act and the power of the Dominion in regard to navigation and shipping, the Dominion must have authority to declare the existence of a public right of navigation over any river navigable in fact. Before the Supreme Court of Canada, Hon. N. W. Rowell, K.C., counsel for the Dominion, made this further contention on the question of federal and provincial control respecting navigation and water ways.

Killed By High Power Wire

Sidbury Couple Riddled Full Charge Of 4,000 Volts

Sidbury, Ont.—A man and his wife met death by electrocution in front of their home while neighbors looked helplessly on. Frank Gerverts, Pearl street, and his wife were the victims.

The man had been attempting to remove a piece of discarded radio aerial wire from a power line carrying 4,000 volts. He was using a mole and a broom handle for his dangerous task when the end of the wire flew up, the end touching his wrist and his wife immediately caught hold of him and she too received the full force of the terrific charge of electricity.

They died clasped in each other's arms. The man had been attempting to remove a piece of discarded radio aerial wire from a power line carrying 4,000 volts. He was using a mole and a broom handle for his dangerous task when the end of the wire flew up, the end touching his wrist and his wife immediately caught hold of him and she too received the full force of the terrific charge of electricity.

Royalty In Talking Film

Dalmoral, Scotland.—The King has just seen himself for the first time in the talking films and apparently enjoyed the experience considerably.

His Majesty, together with the Prince of Wales, was phonorecording recently while reviewing the troops on the "Horse Guards" Parade at Whitehall.

Honored Canadian Minister

Paris.—Premier Mackenzie King, Canada's premier, gave a dinner, Oct. 2, in honor of Hon. Philippe Roy, first Canadian minister to France. The dinner was tendered as a graceful compliment to Madame Roy, whose birthday it was.

British Government Makes Proposals For Huge Settlement Plan

Fire Destroys Castle Of Viscount Lascelles

Property In Irish Free State Mass Of Ruins

Portsmouth, County Galway, Irish Free State.—Portsmouth Castle where elaborate arrangements were made for the approaching visit of the owner, Viscount Lascelles and his wife, Princess Mary, was burned to the ground.

Civic guards and soldiers made a futile effort to bring the blaze under control. The main portions of the Portsmouth Castle were burned in 1827, and the recent fire attacked the remaining parts of the castle and the castle was burned to the ground.

During the night 25 tons of hay on another estate where Viscount Lascelles had planned to visit also were burned. It is stated the visit of the couple to Portsmouth may be postponed.

Would Make Travelling In Empire Easier

Plan To Abolish Passports From One Port To Another

Toronto, Ont.—A campaign for the abolition of the requirements of the British Commonwealth that British-born travellers going from one part of the British Empire to another should possess passports, will be conducted by the Canadian Steamship and Tourist Agents' Association, the association declared recently.

Members of the Association are confident that in this move, they have the sympathy of the travelling public who have to abide by "this unnecessary trouble." They will endeavor to bring to bear upon the British Government through the Department of External Affairs—sufficient strong evidence to have the class of passport eliminated.

Harvesters Have Good Year

Men Returning East With More Money Than Usual

Winnipeg, Man.—Harvesters returning to eastern Canada are taking more of their money home than is usually the case. This is due to the exceptionally fine weather which has favored the operations and to the prolonged season of harvesting because of the unusually heavy crop.

The men returning by tens and dozens to eastern Canada, and some to Great Britain, are well satisfied with the money they have made. Canadian National officials said recently that several had expressed their intention of returning to become permanent citizens of the West.

No Demonstrations Allowed

Jerusalem.—The district commissioner of Jerusalem has refused to allow orthodox Agudath Israel to hold a festival procession on the occasion of Succoth and has also issued a Moslem religious demonstration. It was stated that the government would prohibit any religious manifestation in Palestine.

To Open Office In Peru

Ottawa.—G. R. Stevens, Canadian Trade Commissioner in South Africa, has arrived in Lima, Peru, where he will open a new office with jurisdiction over Peru, Chile and Bolivia.

Mr. Stevens will visit manufacturing centres of Canada in connection with Canadian exports to his former territory.

Aged Indian Chief Dead

Valleyview.—An Indian chief whose age was given in tribal records as 130 years was mourned here by four sons, each of whom is over 80 years old. The aged leader was Manuel Portes, chief of the Santa Rosa Indians.

Empire Party Was Well Pleased With Reception In Canada

Sydney, N.S.—Delegates of the Empire Parliamentary Association have bade their farewells to Canada.

"We have been treated like princes. We have been received like old friends," exclaimed Viscount Peel, chairman of the delegation, addressing a final dinner given by the republican club and city of Sydney. And to his words of farewell and gratitude were added those of representatives from every parliament in the Empire.

In their journeyings through Canada Lord Peel felt, members of the British delegation had been able to remove misconceptions. It had been thought in some quarters apparently that the Empire marketing board was an instrument for pushing British goods in Empire markets. In reality it was designed to push British goods in the British market and the cost fell on the British taxpayer. It had been thought, in some quarters, that the unemployment insur-

ANCE, mislaid the dole, was demoralizing charity. In reality the employee paid his share to a fund and was entitled as of right to his insurance payment when the curse of unemployment fell upon him. "We have heard it suggested," Lord Peel added, "that we desire to load Canada with inefficient unemployed."

"I repudiate with all my force this infamous suggestion, but there are, I think, very great opportunities in Canada, with good organization, for substantial numbers of able and willing workers from our country who will bring a fine type of Canadian citizen. We further discussed the opportunities for the extended marketing of capital from Great Britain and the other Dominions and our speakers have laid stress on the necessity for accurate information as to the conditions of the market so that there was no disappointment to the investor."

From four to five thousand cottages are to be erected in Canada and the new settlers, upon their arrival, will be placed in these cottages. They will live there for a sufficient time, from three to four years, to accumulate savings of \$500 and farm experience, when they will be given a farm. Each settler will be assisted to the extent of \$2,500, to be used either for payment on property or in purchase of equipment. The cottages will cost approximately \$4,000, and this money must be found by the governments.

The settler will pay for his farm in 30 years and the interest rate on the mortgage will be six per cent. In regard to the financing of this huge enterprise, the scheme is quite unusual.

The Canadian department of immigration, through the land settlement branch or a subsidiary corporation, will issue land bonds bearing interest at 4 1/2 or 5 per cent. The bonds will be secured upon the land which is purchased for purposes of the scheme.

The bonds will be guaranteed by the British government as principal and interest. It is said that the British government desires, however, to limit its liability to ten per cent. but this is not the proper scheme.

Compulsory Marking of Eggs

Buyers in England Would Know Product Was Canadian

In consideration of the fact that there is apparently a growing demand in the British Isles for Canadian importations of agricultural products—especially butter and eggs, the Minister of Agriculture and Fisheries of the United Kingdom has now recommended through the committee appointed to deal with such work that as order in council should be made prohibiting the sale of eggs in foreign countries for export to England unless they are marked.

The regulations as to marking are that every egg shall be marked durably in ink in letters at least one-sixteenth of an inch high. Every egg shall bear this mark—the name of the country from which the eggs are to be shipped. This information was received from a bulletin issued by the Saskatchewan Department of Agriculture.

Further this report states, the motive for such an action is to assure the buyers of the Old Land that they are getting products which have been produced in the United Kingdom. There is undoubtedly a growing demand for this trade, and in view of the fact that the Dominion Government have recently taken steps to make such restrictions as will invariably raise the standard of the Canadian product, there is every likelihood of there being a huge increase in the trade in agricultural products in the near future.

This increased interest on the part of the consumers should be appreciated by Canadians, this report intimates, in view of the fact that up to date the exports of such commodities have been rather low as compared with other countries in the Empire or without.

"This action was taken by the Empire Marketing Board to encourage the egg consumers of the Mother Country to buy Canadian products, and that this idea of marking them with indelible ink, under the name of the country would not be destroyed even after the egg was boiled, would assist them in their natural desire to patronize Empire products," quoting this report further.

Figures showing Canada's exportations to the United Kingdom for the month of July this year show the following results: Dressed poultry was exported to the value of \$2,699; butter to the amount of 4,183 cwt.; and eggs to the value of \$17,165, as compared with a total importation value of eggs to the United Kingdom of \$1,822,670.

Fish From Northern Lakes

Thousands of Pounds Shipped From Alberta to Eastern Cities

The map of Canada is being rolled back so far as the economic handling of fish from the northern lakes is concerned, according to the progress made in the shipment of Lake Athabasca trout and whitefish to markets as Chicago, New York and Toronto, says the Financial News. The fishing being carried on by two companies at Lake Athabasca, in Alberta, constitutes the most northern commercial operation in Canada, the extent of which is indicated by E. T. Reed, Federal Inspector of Fisheries, who on his recent return from an inspection of fish taken from the lake in the first three days of the summer fishing season.

First Grain Shipment to Spain

The first shipment of wheat from Montreal to Spain left the other day—20,132 bushels. When the shipment to foreign countries last year amounted to 118,227 bushels from Montreal, but not a single bushel was exported to Spain among the seventeen countries to which grain was consigned. This is said to be the first shipment of grain ever made to Spain.

"Arctolian! A mouse in the soup!" Landlady: "This cook's careless!" But why? Why does she say that? You are not a vegetarian!—Eben Humor, Madrid.

Canada Has Extinct Volcano

Geologists Working in B. C. Say Eruption Occurred 300 Years Ago

Less than 300 years ago Canada possessed an active volcano, in the opinion of explorers who have been studying the mountains north of Alice Arm, in the northeastern section of British Columbia.

The volcano, according to authorities, is now definitely dead and there is now no danger of further eruption. There were apparently two pronounced eruptions which have left their trace and they were separated by a period long enough to allow the lava to cool. The first eruption blew out a crater about 400 yards in diameter. After a period of quiescence sufficiently long to form a hard soil level floor in the crater there was a second eruption which formed a cone of scoria or cinders, within the original crater, 300 feet long with a crater 250 feet deep. It was from the base of this cone that the lava flow proceeded.

From the volcano the lava flowed down a creek valley in a stream 300 yards wide until it entered the valley of the Teas River. Crossing this river to the west side, it completely dammed the stream, forming an enormous lake nearby. The lava then turned north and continued down the valley of the Teas in a stream 2,000 feet wide, as far as the Neas River. By the time it reached the Neas the lava had lost much of its fluidity and the great river was not changed in its course. The lava then flowed down the left bank for six miles. Indians living near the extinct volcano say that the last eruption was about 100 years ago, but geologists discovered trees 170 years old growing on the edge of the lava. They place the time of the eruption at about 300 years ago.

Cost of Raising Dairy Heifers

Record Is Kept at Experimental Station in New Brunswick

An accurate record of the cost of raising dairy heifers was kept at the Experimental Station in New Brunswick. One lot of three heifers including one Ayrshire and two Holsteins, were kept and fed together from birth until they were one year old. They were fed on whole milk until four to five months old, then gradually changed to skim milk. When the calves were three months old they received in addition to the skim milk, one part of flax seed and four parts of meal cooked and made into a gruel. Each calf was fed one pound of concentrate per day. This gruel per day, the amount fed depending upon the ages and condition of the calves. They also received hay, roots and green grass. The composition of the dry grain mixture was varied from time to time but was made up chiefly of three parts grain, two parts crushed oats, one part of cake, and one part brewer's grains. The aim in feeding was to keep the calves growing and to avoid a setback. The superintendent of the station, in his report, published by the Department of Agriculture at Ottawa, shows the detail of the feeding and the cost of the feed, which amounted to \$85 for the three calves during the year.

Canadian Cattle for Australia

Shipment of Purchased Stock to Be Sent from Brandon, Man.

The Australian government has just completed a deal for eighteen foundation heifers and two bulls from J. D. McGregor and Sons, the well-known Aberdeen Angus breeder of Brandon. The animals will be selected from Mr. McGregor's Glenora herd by the headmaster of the Australian government and shipped by the Canadian Pacific Railway by way of Vancouver. This shipment, apart from some purchased dairy cattle for the Orient from British Columbia, is said to be the first exportation of purchased cattle from Canada overseas.

Conditions Have Changed

The pioneer who came to Canada 100 years ago, cut all his bridges behind him. He spent his last cent to get here, hundreds of miles of forest and stream divided him from the coast and there was a six weeks' ocean voyage after that. The only way out was to work, to work for thirty, forty, fifty years and some day he might revisit his homeland at his own expense.

What is thought to be the world's biggest tortoise arrived at the London Zoo recently. It weighs about 300 pounds, is three feet six inches long, and is nearly 100 years old.

"Digging is a good hobby for a middle-aged man," says a doctor, "but why does he so often call it golf?"

STRATFORD-ON-AVON FESTIVAL COMPANY

Members of the Stratford-on-Avon Festival Company photographed on board the White Star liner Laurentic on which they arrived in Montreal recently. The company will make a tour of the principal theatres in Canada and the United States.

Scientist Denounces War

Always Leaves Something To Be Settled, Says Sir Oliver Lodge

Sir Oliver Lodge's recent discourse on war created considerable attention throughout England due to the scientist's strong language.

"War is ugly, disgraceful, to the objectionable business," he said in a presidential address to the Federation of Southern Counties Brotherhood.

"We ought to be ashamed of it. Digging ourselves into the mud and pretending to be civilized people. Crawling about under the water and sinking each other's vessels is no occupation for gentlemen."

"Disputes must be taken to somebody that settles them. War does not settle anything, but leaves something to be settled."

Russian Colony in Paris

Refugees Fleeing From Bolsheviks Accepted Work in France

The Russian revolution added to Paris a foreign colony which now contributes more to the flavor of the city than any other alien group. France was the first European country to offer wholesale asylum to the millions of the Russian nobility when they poured across their borders ahead of the Bolshevik terror.

France offered these gently born and reared people work, and they accepted it eagerly. Some 300,000 eventually established themselves in France, about one-fifth of these in Paris.

English bank rate remains unchanged.

Wireless should be as compulsory as lifeboats on all vessels today.

Miss Olive Williams runs an aviation school on Long Island and already has 150 men in her classes. She teaches mechanics, engineering, airplane construction, and navigation, as well as mere piloting.

When the legion had not finished the main line of the railway at that point. Finally an old sectionman, remaining around the warm stove at Cassis Station, told a yarn concerning the day, the very cold day, on which the west end of the railway was lighted his pipe. Suddenly there was a blaze, and the smell of gas led to one corner of the room, under which was found a natural gas hole.

The fire was extinguished and the news of the discovery noted abroad.

Then the scientists in the vicinity began to brighten and it was learned that the logs for the section house

had been found on flat cars from Castle Mountain near Banff. They had there formed a shack in the construction days of the railway. This was more than thirty-five years ago, and when the building was completed, it was, probably, with the exception of the police stations, the first public building between Calgary and Winnipeg. It will now go the way of all vegetables, for its ash will enrich the earth on the spot where the logs so long did their duty in serving their life and generation. The new section house is being built on the spot where the earth on the spot where the logs so long as its predecessor.

Made Fortune in Northland

Prospector Taking Trip for First Time in Thirty-Three Years

Hector Morrison, from the silver camp at Keno, Yukon Territory, is bound for the outside world for the first time in a generation.

Morrison has relatives back in Woodstock, Ont., and many of these he has not seen since the beginning of the present century. Others have been born and grown up since he went away in the spring of 1880 to seek his fortune in the northland.

Morrison was there for the first gold stampede and in 1886 he camped on the site of Dawson, which was to become the hub of the mining industry. Since then he has lived continuously in the Yukon, following placer mining in the Dawson district until 1915, when he went to Keno and staked a quartz claim the following year.

"Yes, I've enough of the world's gods to keep me from worrying," admitted Morrison, who cleaned up a fortune when he sold his holding to the Treadwell Yukon Limited. "But I'm not quitting the Yukon. I'll never feel rich enough for that. Money can't always buy happiness and I'll be happy only in the north."

Six months of civilization, Morrison thinks, will be enough. Then he'll hit the northern train again.

Suddenly there was a blaze, and the smell of gas led to one corner of the room, under which was found a natural gas hole.

The fire was extinguished and the news of the discovery noted abroad.

Then the scientists in the vicinity began to brighten and it was learned that the logs for the section house

had been found on flat cars from Castle Mountain near Banff. They had there formed a shack in the construction days of the railway. This was more than thirty-five years ago, and when the building was completed, it was, probably, with the exception of the police stations, the first public building between Calgary and Winnipeg. It will now go the way of all vegetables, for its ash will enrich the earth on the spot where the logs so long did their duty in serving their life and generation. The new section house is being built on the spot where the earth on the spot where the logs so long as its predecessor.

When the legion had not finished the main line of the railway at that point. Finally an old sectionman, remaining around the warm stove at Cassis Station, told a yarn concerning the day, the very cold day, on which the west end of the railway was lighted his pipe. Suddenly there was a blaze, and the smell of gas led to one corner of the room, under which was found a natural gas hole.

The fire was extinguished and the news of the discovery noted abroad.

CHAPTER II—Continued.

From his chair, he looked at the shaver, his cheeks red, his dark eyes shining with the fevered glow of a man who has stepped spring and free, Donald was a picture of rugged health and strength. But for all this apparent outward brightness, inwardly he felt rebellious. Douglas's invitation had brought a great longing for the comfort of his past life. Why should he assume the role of a pugilist to seek out an existence? Why wear shabby clothes, and even know the pangs of hunger? He had but to win his father's hat to be destitute and plenty of money would be forthcoming.

"What a life!" "Old Doc's" furnished him a hearty meal. As he selected the money from his meagre supply of cash, to pay his check, Old Doc, with his grizzled head forward, "Don't go hungry; come in any time."

"Thank you," he said. He would wait in a dark room. He heard the sound of happy laughter coming from a saloon on the corner. There behind those swinging doors he saw the merry faces of the waiters. He stood in the door of the restaurant and looked across the street at the twin peaks, known as the "Lions," which guard the entrance to Vancouver's harbor. The sun was setting in a mass of fiery clouds; the clouds became luminous, and a golden splendor spread over the water. The mountains were reflected in violet, while the snow-capped peaks shone in a faint stain of rose. Donald's face glowed as he watched.

"Home, country," he breathed. He turned to catch a friendly smile from Old Doc as he worked over his range. "And some people!" he added fervently.

He was now he turned to the mountains. The glow had vanished and the Lone stood in bold relief against the sky. The mountains were now a strength to his being. "I'll not quit. I'm going to make good," he said grimly.

CHAPTER III.

While on his daily run around Stanley Park, the next morning Donald was attracted by a horse and rider standing on Prospect Point. The rider was interested in a huge white lion pouncing on a young man through the pines, looking a head tie. The horse, a noble animal, with full mane and tail, was resting, rocking and basking in the sun's rays to the effect.

When Donald lifted his eyes to the rider he saw a beautiful woman, a heavy mass of dark brown hair, neatly coiffed under a slim riding hat, and a pair of white gloves. He felt suddenly grew cold.

A blizzard of dirt and pebbles stung

Donald's face as he turned to see

the rider, who was now looking

at him with a cold, hard stare.

"What a life!" he thought, as he

looked at the rider, who was now

looking at him with a cold, hard

stare.
